Title: Recycling Best Practices Internship
Type: Internships/Seasonal/Fellowships

Background: The University of Michigan Plant Building & Grounds Services department is interested in compiling best recycling practices from high performing campus buildings in order to share those practices with low performing buildings. The goal of this exercise is to increase recycling rates across campus. We are seeking to hire a student to assist with data gathering, interviews and reporting from those working and studying in high performing buildings.

Responsibilities: Under the guidance of the Recycling Coordinator, gather waste generation data, interview facility managers and generate reports from the highest-performing buildings on campus in terms of recycling rate.

Qualifications: Students currently enrolled in a relevant degree program or recent graduates with training in a related field. Applicants must have experience working in a professional environment, have strong writing skills and demonstrate the ability to work independently. Knowledge of recycling, waste reduction and environmentally-preferable waste management practices are preferred but not required. References will be requested.

Work Location: Plant Building & Grounds Services Building, 109 E. Madison, Ann Arbor.

Schedule: Approx. 15/hours per week; flexible scheduling is available.

Duration: Early May 2010 through late August 2010

Wage: $10/hour

Deadline: N/A

To Apply: Email a cover letter and resume to:
Tracy Artley, Sustainability Programs Coordinator
Email: artleyt@umich.edu

Organization: University of Michigan Plant Building & Grounds Services
